# GEOGRAPHIC INDEX TO

# EXCHANGE BIBLIOGRAPHIES 1 TO 565

by

James C. Starbuck

Index numbers (358.67,72) refer to bibliography number (358) followed by page numbers (67,72). The entry numbers used in some EBs are not indexed. Descriptive words used in this index refer to topics of bibliographies and not necessarily to titles of subjects of individual entries.

Place names used in the authoring agency (U. S. Department of Transportation), the title, the periodical name (MICHIGAN MUNICIPAL REVIEW), or an abstract/annotation are indexed herein with the exception of the word "America(n)" which is identified only where used in title.

Reference to two or more places having the same name on a single page of a bibliography are indexed separately (New York City and New York State). Compound place names are indexed only by the lesser jurisdiction (the Akron but not the Ohio in Akron, Ohio).

Places have been indexed only according to what the eye sees. Even though STREETCAR SUBURBS may be known to concern Boston, it is not referenced thereunder, because the researcher unfamiliar with this book would have no way of determining which of twenty or so citations on a page was the one he sought.

Some flexibility on the reader's part is expected (Uttar Pradesh in the index may be only U.P. in the bibliography). To aid the researcher in finding alternative names (Ceylon for Sri Lanka) and hierarchies (Harlem, Manhattan, New York City, New York), a REFERENCE GUIDE has been provided.

Also provided are listings of bibliographies that have been revised, ones that are annotated (or use abstracts), and those that have their own indexes, which vary greatly in length and style (author, title, subject, and/or place).

Bibliographies having multiple numbers 74-75, 358-359-360 are referred to by first number only (74, 358).

Exchange Bibliographies that have been revised:

| | | | |
|---|---|---|---|
